【参考范文】

Nowadays more and more people choose to live an environmentally friendly lifestyle. Our surroundings are being polluted fast and man's present efforts cannot prevent it. Time is bringing us more people, and more people will bring us more industry, more cars, larger cities and the growing use of man-made materials. Fortunately, the awareness of protecting environment is being accepted by an increasing number of people.

To achieve a green lifestyle, we must adjust our behaviors, which can be done even with simple things. For example, we could sort out our trash for better recycling. At home, we can use lights and other electric appliances only when needed. Other simple steps that can make a big difference include using public transportation instead of driving private cars. Commuters can choose to take buses, subways or share cars with others, which can not only relieve traffic jams but also can reduce gas emission.

To serve as responsible stewards of the planet, we are expected to take an environment-friendly lifestyle to conserve the environment, and more importantly, to strike a balance between man and nature.
